

Compact-class electric-powered pressure washer

Cold water power for food service & commercial applications

HD Compact Class – durability in a small package

Kärcher's Classic Series electric powered cold water units are compact, highly mobile and hard wearing. Built with high grade lightweight polypropylene and designed with usability and ergonomics in mind, these units feature patented direct drive Kärcher axial pumps with corrosion-resistant brass cylinder heads and protected by a 5-year warranty. They can deliver up to 4.5 GPM at 3200 PSI and are ETL certified to UL and CSA standards.

HD 1.8/13 C Ed*

HD 2.3/15 C Ed

HD 2.3/14 C Ed Food†

HD 3.0/20 C Ea

- No fossil fuel emissions or fumes
- Ergonomic design
- Low-pressure soap injection system
- Complete trigger shut off
- Triple changeover nozzle
- ETL certified to UL and CSA standards

Technical Data

Order No.	1.514-136.0	1.150-626.0	1.150-614.0	1.150-625.0

† Accepts inlet water at temperatures up to 180°F

*The HD 1.8/13 C Ed model does not feature variable flow-and-pressure and comes with extended trigger gun and rotating wand

Easy press trigger gun

- Ergonomic design
- Soft grip for greater comfort.

Automatic pressure cut-off

- For reduced energy and water consumption.
- Switches off immediately when work is interrupted.

Servo Control

- Pressure and water flow can be adjusted at the gun.

Ultimate mobility

- For quick cleaning at different locations.
- Space-saving storage.

Ergonomic features

- Comfortable non-fatiguing trigger gun features “one-finger” operation.*

Powerful and durable

- Pump is protected by a pressure switch and overflow valve.
- Built-in motor protection against voltage fluctuations and excessive temperatures.
- Patented motor/pump unit is integrated in a single housing, ensuring extra-efficient energy transfer.
- Pressure-controlled automatic shutdown system stops the motor and pump completely when the trigger gun is released, extending the life of key components.
- Protective cover made of high-impact materials shields key components from elements.
- Triple nozzle can be adjusted for 0° pencil jet, 25° fan spray, or 40° low-pressure chemical application.
- All compact models are ETL certified to rigid UL and CSA safety standards.

Smart features

- Adjustable downstream chemical injection system for precise detergent application.
- Compact and robust 3-piston axial pump features brass cylinder head and hardened steel pistons and valves.
- Exclusive 33’ flexible anti-kink hose with integrated connection swivels inside the gun under full pressure to avoid tangles.
- Machines feature ground-fault circuit interrupters (GFCI) for operator safety.
- Infinitely variable adjustment of pressure and water flow allows optimum flexibility for different cleaning tasks.*
- Stainless steel spray lance rotates 360° under pressure*.

Outstanding mobility

- Light-weight upright construction with adjustable pull-out handle for ease of storage.
- Upright design for easy, ergonomic transport.
